#### End user

> Nigeria Gas Co Ltd

#### Contractor

> Zakhem Construction  
Nigeria LT

#### Year

> 2007

#### Contract value

> 1.38 million USD

### ► NOTES

#### Gas supply

Abeokuta is a city in Nigeria, capital of Ogun State.

Scope of work included:

- 35kms x 24» OD class 600 gas pipeline, design capacity 250 mmscfd, from the intermediate pig launcher station on the ELP Itoki / Papalanto transmission pipeline to Abeokuta.

- Tie in/pig launching station/facilities at the intermediate pig launcher

- Class 600 Abeokuta Gate Station (ACGS) at Onijaganjagan Industrial Estate and hook up to potential gas distribution facilities at Abeokuta.

Zakhem was looking urgently for some quantities of pipes to be delivered in the fastest way possible to start the project. The job was requiring at the beginning to source around 1000 meters from stock and more if available. With our sourcing network we managed to supply them 5000 meters of material as per specification.
