

# RABIGH DEVELOPMENT

Kingdom of Saudi Arabia

## FACT & FIGURES

### End user

> Petro Rabigh

### Contractor

> Foster Wheeler UK

### Year

> 2007

### Contract value

> 2.5 million USD

## NOTES

### Carbon Steel

The Rabigh Refinery is a topping refinery and consists of a 340000 bpd crude distillation unit, a 47000 bpd hydro treater, a 12 mmscfd hydrogen plant, a 75000 bpd naphtha Merox unit and a 60000 bpd kerosene Merox unit along with supporting utilities, product tank age and a marine terminal.

Rabigh is Aramco's swing refinery. Output levels tend to vary, but can rise as high as 400000 bpd as a result of crude unit debottlenecking carried out in 1998.

This project is the first step in creating a fully integrated refinery / petrochemical complex.

## TECHNICAL DATA

### Type of products supplied

> Carbon steel piping packages.

### Quantity

> Around 1300 tons of Carbon steel pipes and fittings.

### Delivery Schedule

> During 2006 - 2007.
